

“

Difficulties Patients Face after Laser Procedures

01. Increased Skin Sensitivity

It stings and feels hot.

02. Dryness and Tightness

My skin feels so dry, like it's cracking.

03. Pain and Heat Sensation

My face feels burning and painful.

04. Stress Over Recovery Time

I wish the recovery process could be faster.

05. Difficulty Choosing Suitable Skincare Products

I hope there are skincare products that
can help after laser procedures.

5 Essential Growth Factors Formula

Hydration & Moisture
Balance Cream

5 Growth Factors

EGF	Epidermal Growth Factor
Role	A protein that promotes skin cell repair and regeneration.
Function	Stimulates the proliferation of keratinocytes and fibroblasts, aiding in the repair of damaged tissues, increasing collagen production for improved skin elasticity, and accelerating the wound healing process.
Benefits	Repairs micro-injuries, reduces fine lines, and enhances skin elasticity.

FGF1	Fibroblast Growth Factor 01
Role	A multifunctional growth factor protein that promotes cell growth, tissue regeneration, and wound healing.
Function	Activates fibroblasts within the skin, accelerates wound healing and tissue repair, induces angiogenesis, and supplies oxygen and nutrients to the skin.
Benefits	Restores the skin barrier and provides a soothing effect.

FGF10	Fibroblast Growth Factor 10
Role	Promotes cell proliferation and tissue repair.
Function	Stimulates the proliferation and migration of keratinocytes, aiding in the repair of damaged skin tissue.
Benefits	Accelerates the healing of burns and laser-induced wounds, enhances skin flexibility, and improves moisture retention.

IGF	Insulin-like Growth Factor
Role	A growth factor similar to insulin that promotes cell growth and tissue repair.
Function	Stimulates collagen synthesis, enhances skin elasticity, supports skin cell regeneration and proliferation, reduces inflammation, and protects the skin.
Benefits	Prevents skin aging, improves wrinkles and skin elasticity, and promotes cell recovery for healthy skin.

PDGF	Platelet-Derived Growth Factor
Role	Facilitates wound healing and tissue regeneration.
Function	Promotes fibroblast proliferation, induces angiogenesis (the formation of new blood vessels), and activates the migration and proliferation of necessary cells to the wound site.
Benefits	Accelerates wound healing, supports skin regeneration, and aids in tissue repair.

Exceptional Stability and Skin Penetration

Helps Restore Damaged and Aging Skin

Maximizes Skin Protection with High-Moisture Ingredients

”

Contains 5 Growth Factor Ingredients and Hydration · Skin Barrier Protection Components to Maximize the Effects of Laser Treatments

| Hydration-Enhancing :

Hyaluronic Acid, Glycerin, Ceramide, and PDRN deliver moisture and a soothing effect to temporarily sensitive and dry skin

| Moisture-Enhancing : Shea Butter, Jojoba Oil

| Brightening : Niacinamide

| Wrinkle Improvement : Adenosine, AH

Key Benefits

- 01 Growth Factor**
that restores cell function
promote skin regeneration
and wound healing
- 02 Triple Moisturizing Solution**
for helping all-day hydration
- 03 Combine Ampoule Formula**
promotes collagen formation
to improve wrinkles and
brighten skin
- 04 Convenient Airless Container**
for time-saving convenience
- 05 All-in-One Care**
that simplifies the
busy modern lifestyles
- 06 Strengthens the Skin Barrier**
to reduce inflammation and
protect the skin
